How to use this document. Sections 01–05 define who Rhymvex is and how it looks and sounds. Sections 06–08 are working playbooks for social content and ads. Sections 09–12 keep everything consistent as the agency grows. Hand the full PDF to designers and partners; use the one-pager (Section 12) for quick reference.

01 — Brand Overview

What Rhymvex is

Rhymvex is a **brand and product agency** that helps founders and companies build clear, high-performing brand systems across design, content, and growth. We combine strategy, design, and systems thinking to turn complex ideas into repeatable patterns that look great and convert.

Positioning statement

For founders and teams who need more than random visuals and one-off campaigns, Rhymvex provides **end-to-end brand systems** that align design, messaging, and growth into a single, coherent engine.

Core promise

“We turn complex ideas into clean, repeatable systems that look great and perform.”

Brand personality

- **Sharp & modern** — contemporary, tech-literate, design-forward.
- **Confident, not arrogant** — clear authority without hype.
- **Structured & creative** — design with systems and logic behind it.
- **Slightly edgy** — not corporate, not generic.

Tagline

“Build with rhythm.”

Secondary options for campaigns: *“Patterns, solved.”* · *“Design. Systems. Impact.”* Use the primary tagline in bios, website hero, main ad headlines, and channel banners; use secondary lines sparingly.

02 — Visual Identity: Logo System

Primary logo

Horizontal wordmark “Rhymvex” in a clean, geometric sans-serif. Use on website headers, proposal covers, deck title slides, YouTube/LinkedIn banners, and main marketing assets.

Icon / monogram

“Rv” monogram or a simple abstract symbol inspired by rhythm, waves, or nodes. Use on profile pictures (Instagram, TikTok, X, LinkedIn, YouTube, Facebook), favicons, app icons, and any placement where the full wordmark does not fit.

Clear space & minimum size

- Clear space: at least the height of the letter “R” on all sides.
- Digital: minimum 24 px logo height in UI and ads.
- Profile pictures: export at least 400×400 px (platforms scale down).
- Print: minimum 8 mm logo height.

Logo rules

DO

- Use on solid or simple backgrounds (Black, Slate, or dark images with overlay).
- Use the full-color version on dark backgrounds.
- Use the white or black mono version on busy images with sufficient contrast.

DON'T

- Stretch, skew, or rotate the logo.
- Add effects (drop shadows, gradients, outlines) outside a defined system.
- Place on low-contrast or noisy backgrounds without a safe zone.
- Change colors outside the defined palette.

03 — Color Palette

Strong contrast on small screens and in fast-scrolling feeds. Maximum three main colors per creative: Black/Slate + White + Volt ($\pm$ Ember).

Rhymvex Black

#0B0F14

Primary background — posts, reels covers, story templates, ad backgrounds

Rhymvex Slate

#151B24

Secondary backgrounds — cards, overlay panels, UI surfaces

Rhymvex White

#F5F7FA

Primary text on dark backgrounds; main headings and key UI text

Rhymvex Volt

#6EE7FF

Primary accent — CTAs, buttons, key words, highlights, metrics

Rhymvex Ember

#FF6B6B

Secondary accent — urgency tags (“New”, “Limited”), alerts

Neutral scale

#0B0F14 #111720 #151B24 #1E2633 #2A3342 #3A4559
#5B6A82 #8A96A8 #B8C2D1 #F5F7FA

Backgrounds: Black/Slate · Primary text: White (80–100% opacity) · Secondary text: 60–70% white · Borders/dividers: 15–25% white · Primary CTA: Volt background with Black text.

Usage by surface

- **Feed posts (IG, LinkedIn, X, FB):** Black/Slate background, bold White headline, Volt accents, 60–70% white secondary text.
- **Stories / Reels / TikTok:** Black/Slate base with subtle gradient or grid. Volt for progress bars and highlight stickers; Ember for urgency tags (“48h left”, “New”).
- **Paid ads (Meta, Google, LinkedIn):** simple background, bold White headline (1–2 lines max), Volt CTA button with Black text, small logo top-left or bottom-right.

Never put text directly on busy images without a dark overlay, and never use more than three main colors in one creative.

04 — Typography

Primary family: Inter

Weights 400 / 500 / 600 / 700. Use for all social graphics, ad copy, thumbnails, story text, website UI, and documents. Inter is free and widely available — no licensing friction.

```
font-family: Inter, system-ui, -apple-system,  
'Segoe UI', Roboto, 'Helvetica Neue', Arial, sans-serif;
```

Optional display font (marketing headlines only)

Space Grotesk or **Sora** — hero headlines on the website, campaign posters, special promo graphics. Never for body text or long paragraphs. If a “display” feel is needed in social graphics, use heavier weights of Inter instead of another font.

Type scale

H1	48–56 px · lh 1.1 · SemiBold/Bold
H2	36–40 px · lh 1.2 · SemiBold
H3	28–32 px · lh 1.25 · Medium/SemiBold
Body	16 px · lh 1.6 · Regular
Small	14 px · lh 1.5 · Regular
Caption	12 px · lh 1.4 · Regular/Medium

Social & ads

- Post headlines (1080×1080): 36–48 px equivalent, Bold, max 2 lines, 6–10 words.
- Body text in images: 18–22 px equivalent, 2–4 short lines. Details belong in captions.
- Ad headlines: 4–8 words, Bold, with 1–2 key words highlighted in Volt.
- Thumbnails (YouTube / video ads): 60–80 px equivalent, 2–5 words max, White on Black/Slate with Volt accent.
- Uppercase labels/nav: letter-spacing 0.06–0.08em. Sentence case: default.

Rule of thumb: one font family per creative. Consistency beats novelty in the feed.

05 — Voice & Tone

Core voice: **clear, confident, structured, slightly playful** — especially around “rhythm”, “patterns”, and “systems”. Show expertise without jargon overload.

Tone by channel

Instagram / TikTok

Visual-first, short captions, punchy hooks.

“Your brand doesn’t need more noise. It needs a system. ✂”

LinkedIn

Detailed, case-study oriented, professional but human.

“We rebuilt this brand’s entire content system. Results: 3x inbound leads in 90 days.”

X / Twitter

Concise, sharp, occasionally witty.

“Most brands don’t have a content problem. They have a pattern problem.”

Ads (Meta/Google /LinkedIn)

Direct, benefit-led, low fluff.

“We design brand systems that convert. See our work.”

Messaging pillars

- **Systems over randomness** — “Stop guessing. Start systemizing.” · “From random posts to repeatable growth.”
- **Design + performance** — “Design that doesn’t just look good — it performs.”
- **Clarity & focus** — “If your message is fuzzy, your results will be too.”
- **Partnership & enablement** — “Not just a project — a playbook.”

CTAs to reuse

See our work · Book a call · Get your brand audit · Start your project · View case study · Download the framework

06 — Content & Creative System

Content pillars

- **1. Work / Case studies** — before/after visuals, metrics, short breakdowns: Challenge → Solution → Result.
- **2. Process & systems** — how we build brand systems; frameworks, checklists, diagrams; behind-the-scenes.
- **3. Thought leadership** — opinions on branding, design, marketing; “most brands get X wrong”; trend takes.
- **4. Offers & lead magnets** — free audits, templates, mini-guides; limited campaign slots; workshop promos.

Every post must clearly fit one pillar. Plan two weeks of content at a time across all four.

The four must-have templates (Figma/Canva)

Case Study Card

“Case Study” label in Volt · large visual (mockup / before-after) · 2–3 bullet results + CTA “See full case study”.

Quote / Insight Card

Black/Slate background with subtle grid or wave · large White quote · small “— Rhymvex” attribution in muted white.

Offer / Promo Card

Bold headline (e.g. “3 Brand Slots — January”) · 1–2 line description · Volt CTA button (“Book now”) · Ember badge for urgency.

Process / Framework Card

Title + numbered steps with icons · Volt numbers/connectors · minimal text per step.

Keep margins generous and never crowd text. Reuse the same grid, type scale, and color logic across all templates.

Video / Reels / TikTok style

- Format: 9:16 vertical, 1080×1920.
- Background: Black/Slate with simple motion — subtle zoom, pan, or animated grid.
- Hook in the first 1–2 seconds: large White text with Volt highlight; 1–2 lines max on screen.
- Watermark: monogram icon bottom-right at low opacity.
- Intro (1–2 s): logo + tagline “Build with rhythm.” · Outro: CTA + logo.

07 — Profile & Channel Setup

Profile pictures

Monogram “Rv” on Black background, centered and high contrast — identical across Instagram, TikTok, X, LinkedIn, YouTube, and Facebook. Export $\geq 400 \times 400$ px.

Banners / covers (LinkedIn, YouTube, X)

- Left: large “Rhymvex” wordmark.
- Center/right: tagline + one-line value prop.
- Optional small CTA: “See our work → rhymvex.com”.
- Keep text inside each platform’s safe zones.

“Rhymvex — Brand & Product Agency. We build brand systems that convert.”

Bios

Instagram / TikTok

“Brand & product agency. We turn ideas into systems that look great and perform. □ rhymvex.com”

LinkedIn

“Rhymvex is a brand and product agency. We help founders and companies build clear, high-performing brand systems across design, content, and growth.”

X / Twitter

“Brand & product agency. We build systems, not just visuals. Patterns, solved.”

Use a consistent handle where possible: @rhymvex.

08 — Ad Creative Guidelines

Meta (IG/FB) feed ads

- Format: 1080×1080 or 1080×1350.
- Structure: hook headline (White, bold) → visual (mockup, result graphic, before/after) → short subtext + Volt CTA button.
- Keep on-image text minimal; the caption carries details.

Example — image: “Your brand needs a system.” · caption: “We design brand systems that turn attention into revenue. See our work and case studies.” · CTA: “See our work”.

Story / Reels ads

- Full-screen vertical; first frame is the hook — big text, 3-6 words.
- Quick cuts, simple motion, minimal on-screen text; end frame with clear CTA + logo.

Example — Frame 1: “Tired of random content?” → quick work showcase → End: “Get a brand system that works. Book a call.” + logo.

LinkedIn ads

- Professional tone, still visual. Case-study style creatives: “How we 3× inbound leads in 90 days”.
- Simple chart/graph in Volt on Slate. CTA: “Book a call” or “Download case study”.

Google Display / YouTube

- Consistent branding: Black/Slate background, White text, Volt accents.
- Pre-roll: strong hook + visual in first 3 seconds → quick proof (metrics, logos, before/after) → CTA + logo.

Build 3-5 ad variations — two feed ads (work-focused, offer-focused), one story/reels ad, one LinkedIn case-study ad — and A/B test headlines and CTAs.

09 — Do's & Don'ts

DO

Use a consistent template system so the feed looks cohesive.

Highlight one key idea per creative.

Keep text short and legible on mobile.

Use Volt strategically to guide the eye (CTA, key numbers, key words).

Keep the same profile pic, color feel, and tone across all channels.

DON'T

Change styles every week — consistency builds recognition.

Overload posts with text or too many visuals.

Use random colors or gradients outside the palette.

Move the logo to a different position on every post — pick 1-2 standard spots.

Write long paragraphs inside images — that belongs in captions.

10 — Implementation Checklist

- ☑ **Assets.** Finalize logo (wordmark + icon) in SVG/PNG · export profile pics and banners per platform · build 4-6 core post templates in Figma/Canva.
- ☑ **Profiles.** Update profile pics, banners, bios on IG, TikTok, X, LinkedIn, YouTube, FB · set consistent handle (@rhymvex).
- ☑ **Content.** Plan 2 weeks of posts across the 4 pillars · create at least 4 case-study cards, 4 quote/insight cards, 2 offer/promo cards, 2 process/framework cards.
- ☑ **Ads.** Build 3-5 ad variations (2 feed, 1 story/reels, 1 LinkedIn) · A/B test headlines and CTAs.
- ☑ **Documentation.** Save this guide as PDF + Notion/Google Doc · share with everyone creating content or ads for Rhymvex.

11 — Asset Organization & CSS Tokens

Suggested folder structure

```
/rhymvex-brand  
  /logo      wordmark + icon, primary/white, .svg + .png  
  /colors    palette swatches + colors.css / colors.scss  
  /type      font files + type-scale reference  
  /templates social cards, ad formats (.fig / .canva)  
  /guidelines this PDF + condensed one-pager
```

Design tokens (CSS variables)

```
:root {  
  --rhymvex-black: #0B0F14;  
  --rhymvex-slate: #151B24;  
  --rhymvex-white: #F5F7FA;  
  --rhymvex-volt: #6EE7FF;  
  --rhymvex-ember: #FF6B6B;  
  --font-primary: Inter, system-ui, -apple-system, sans-serif;  
}
```

Keep tokens in a single source of truth (CSS/SCSS or Figma variables) so every template and web surface stays in sync.

12 — Brand at a Glance

A condensed reference for designers, VAs, and ad creators. Full details live in sections 01-11.

**Rhymvex Black**

#0B0F14

Primary background — posts, reels covers, story templates, ad backgrounds

**Rhymvex Slate**

#151B24

Secondary backgrounds — cards, overlay panels, UI surfaces

**Rhymvex White**

#F5F7FA

Primary text on dark backgrounds; main headings and key UI text

**Rhymvex Volt**

#6EE7FF

Primary accent — CTAs, buttons, key words, highlights, metrics

**Rhymvex Ember**

#FF6B6B

Secondary accent — urgency tags (“New”, “Limited”), alerts

Type & voice

- **Font:** Inter (400/500/600/700) · display: Space Grotesk or Sora, headlines only.
- **Tagline:** “Build with rhythm.” · Voice: clear, confident, structured, slightly playful.
- **CTAs:** See our work · Book a call · Get your brand audit · Start your project.

Content pillars & golden rules

- Pillars: Case studies · Process & systems · Thought leadership · Offers & lead magnets.
- Max 3 colors per creative; one font family; one idea per post; text legible on mobile.
- Logo in 1-2 standard spots; details in captions, not inside images.
