

Brand Kit & Guidelines v1.0

Agency Portfolio & Social/Ads Focus

Build with rhythm.

September 2026

We turn complex ideas into clean, repeatable systems that look great and perform.

Positioning

End-to-end brand systems aligning design, messaging, and growth.

Personality Specs

Sharp & modern (tech-literate) | Confident, not arrogant | Structured & creative | Slightly edgy.

Primary Logo (Wordmark)

Website headers, proposal covers, deck title slides, main banners.

Icon / Monogram

Profile pictures, favicons, app icons, constrained UI.

Typography Engine

Primary Family: Inter Zero licensing friction

Display Options: Space Grotesk or Sora Hero headlines only

**H1: 48–56 px · lh 1.1 ·
SemiBold/Bold (Max 2
lines, 6–10 words for
posts)**

Body: 18–22 px equivalent in
images, max 2–4 lines.

Primary Accent

Volt: #6EE7FF (`--rhymvex-volt`)
Function: CTAs, metrics, highlights.

Secondary Accent

Ember: #FF6B6B (`--rhymvex-ember`)
Function: Urgency, alerts.

Platform	Bio Standard	Example Hook & Tone
IG / TikTok	"We turn ideas into systems that look great and perform."	Tone: Visual-first, punchy. "Your brand needs a system. ⚡"
LinkedIn	Focuses on helping founders build high-performing systems.	Tone: Detail-oriented, professional. "Results: 3x inbound leads..."
X / Twitter	"We build systems, not just visuals. Patterns, solved."	Tone: Sharp, concise, witty. "Most brands have a pattern problem."
Paid Ads		Tone: Direct, benefit-led. "Design systems that convert. See our work."

Messaging Pillars

- Systems over randomness
- Design + performance
- Clarity & focus
- Partnership

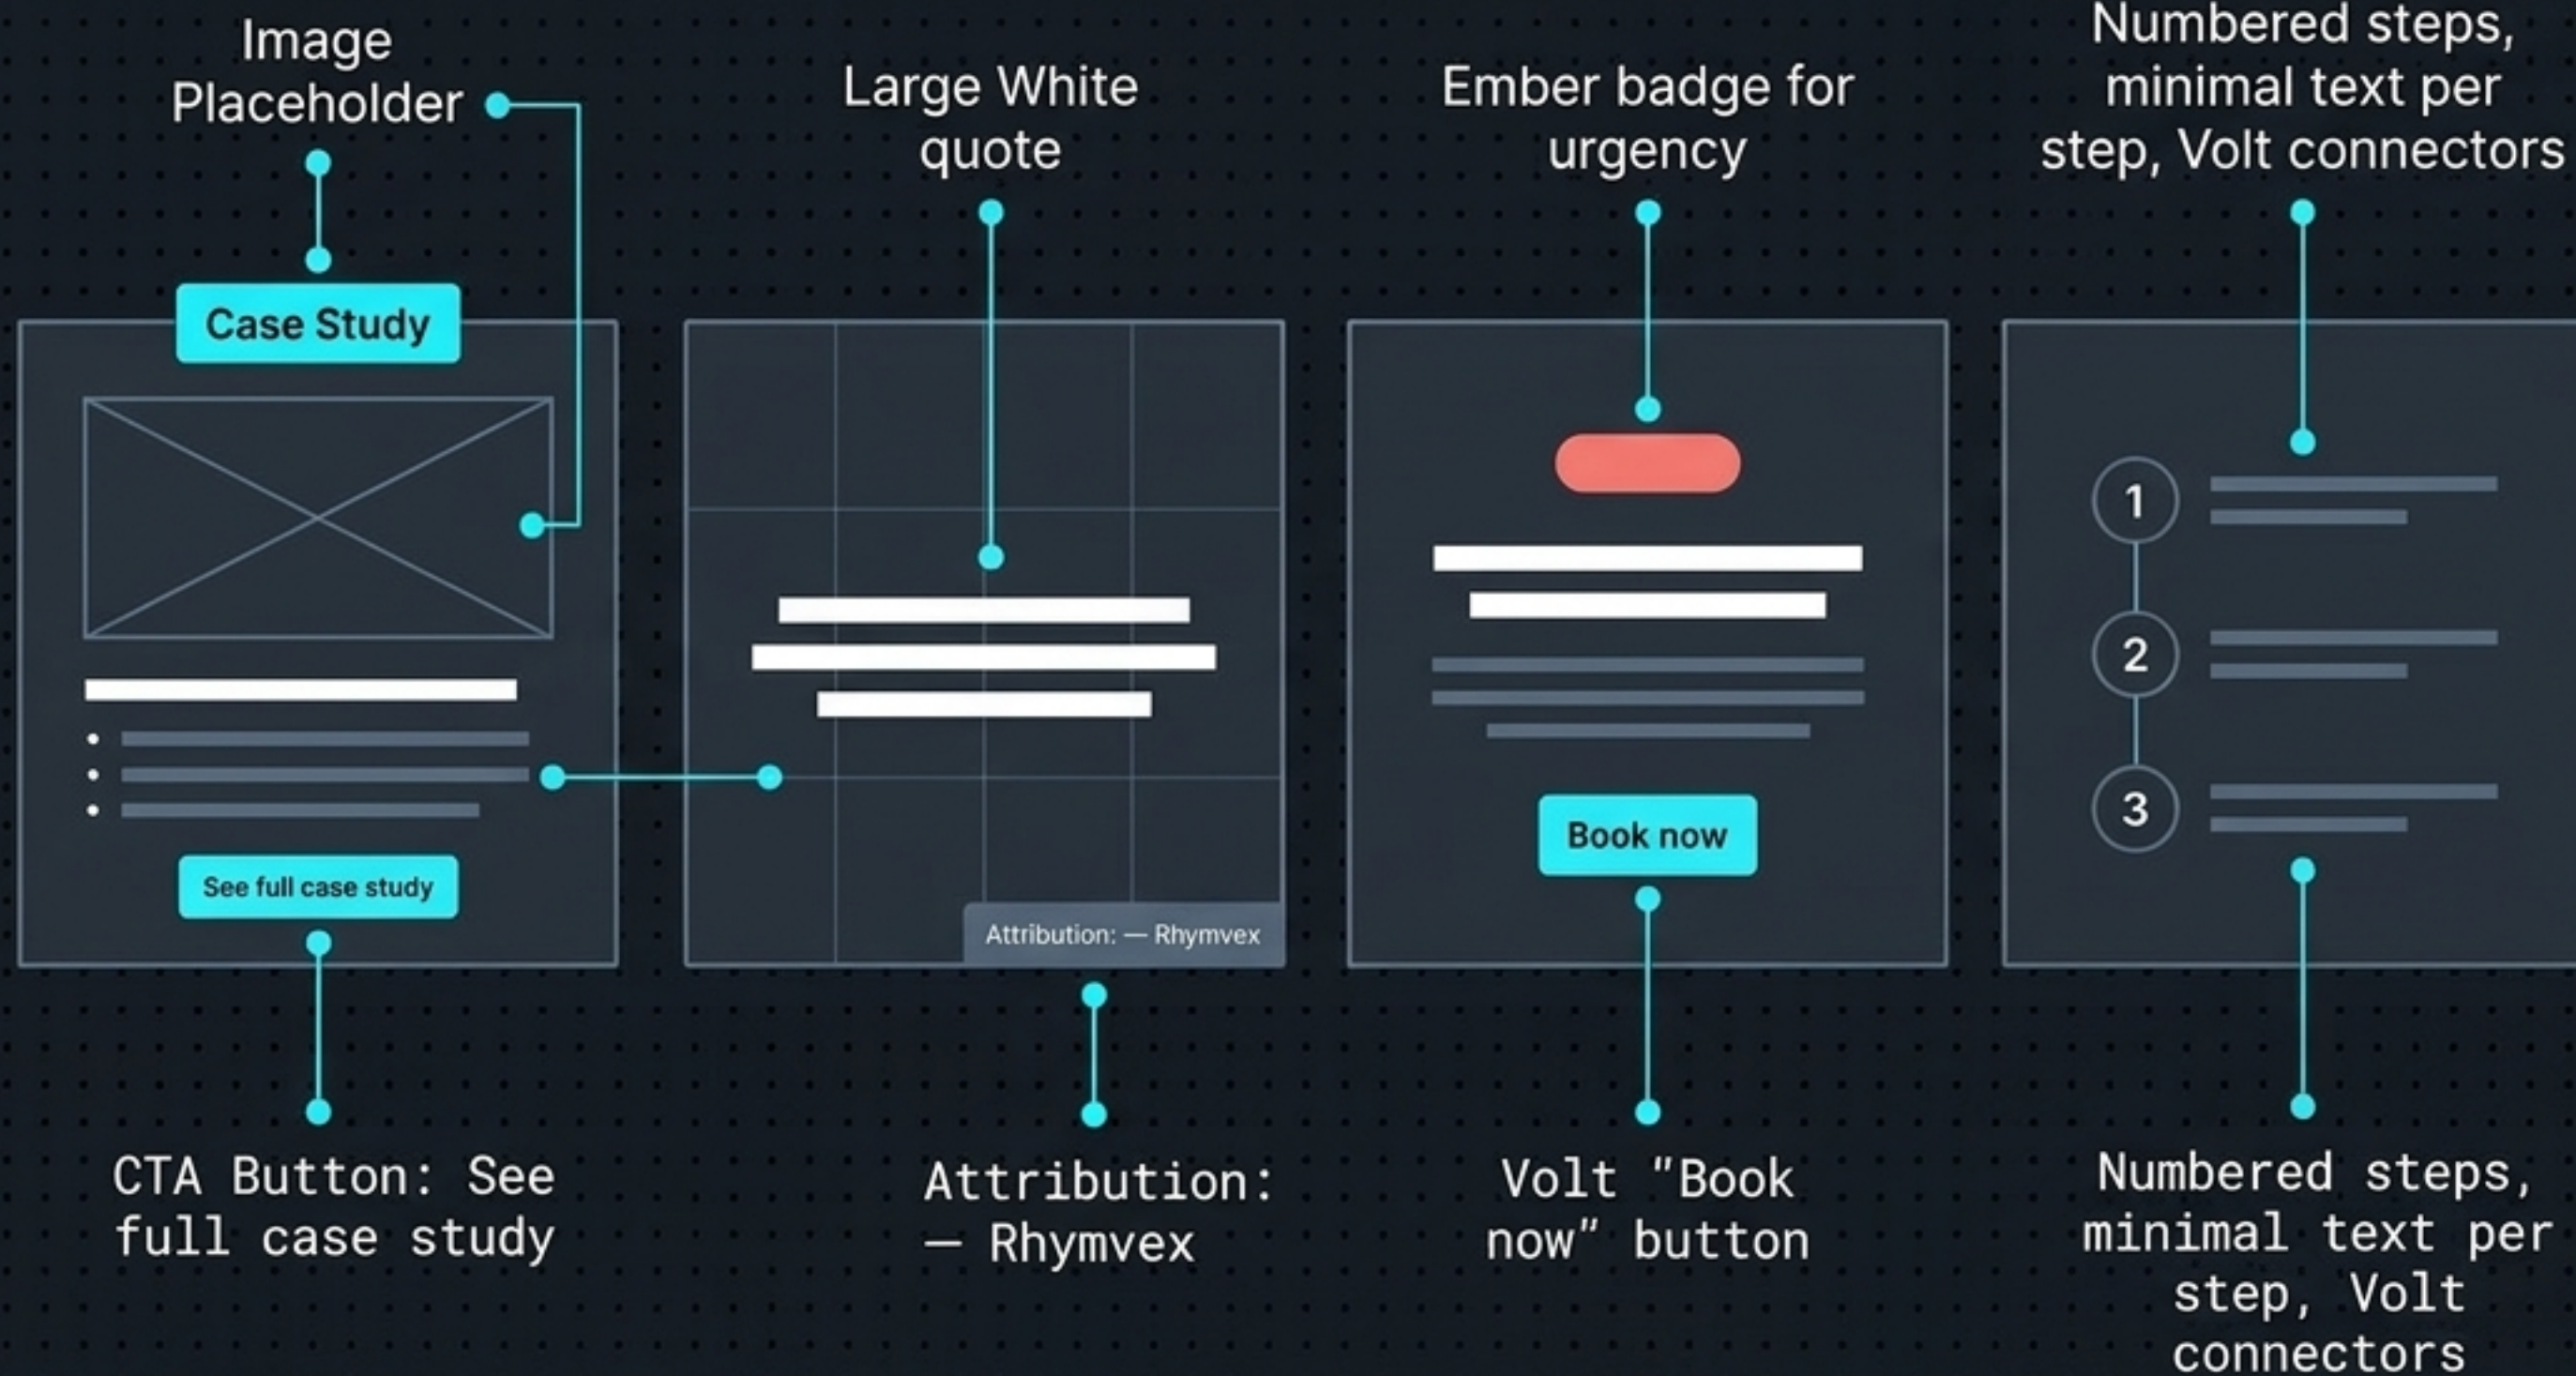

Approved CTAs

Book a call

Start your project

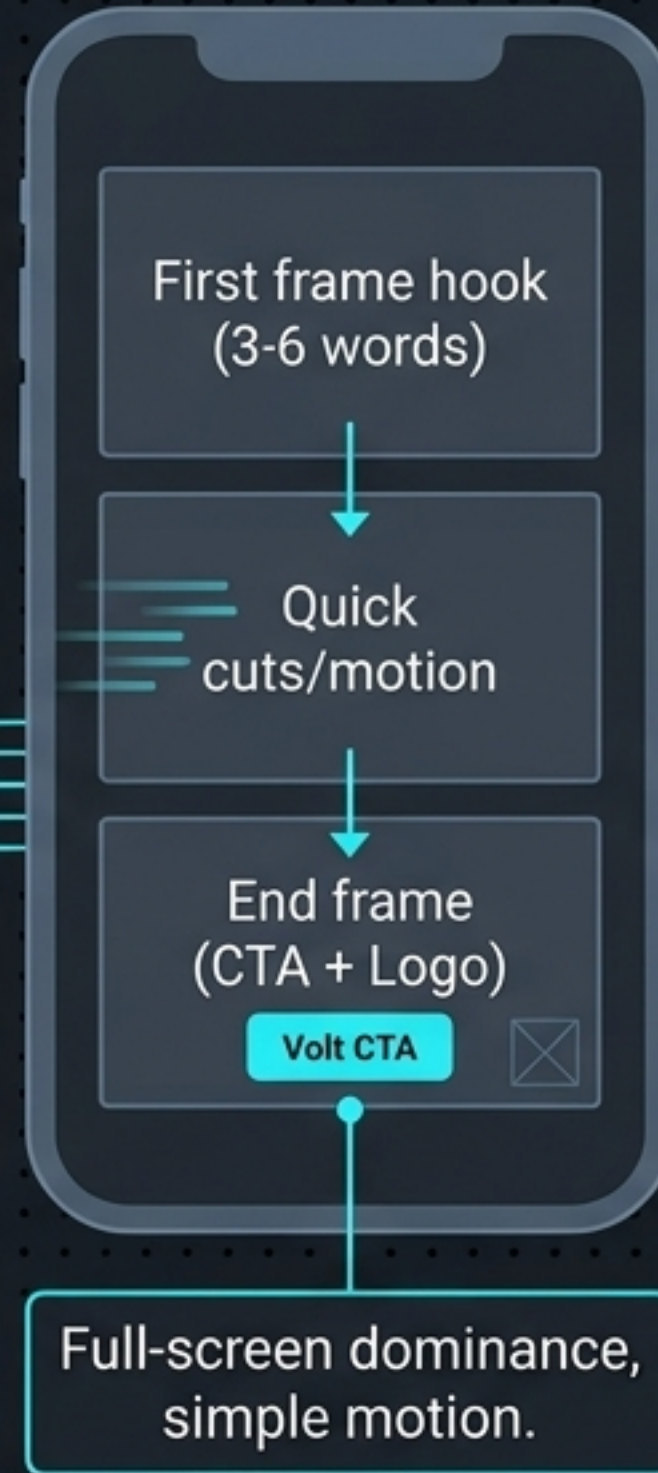

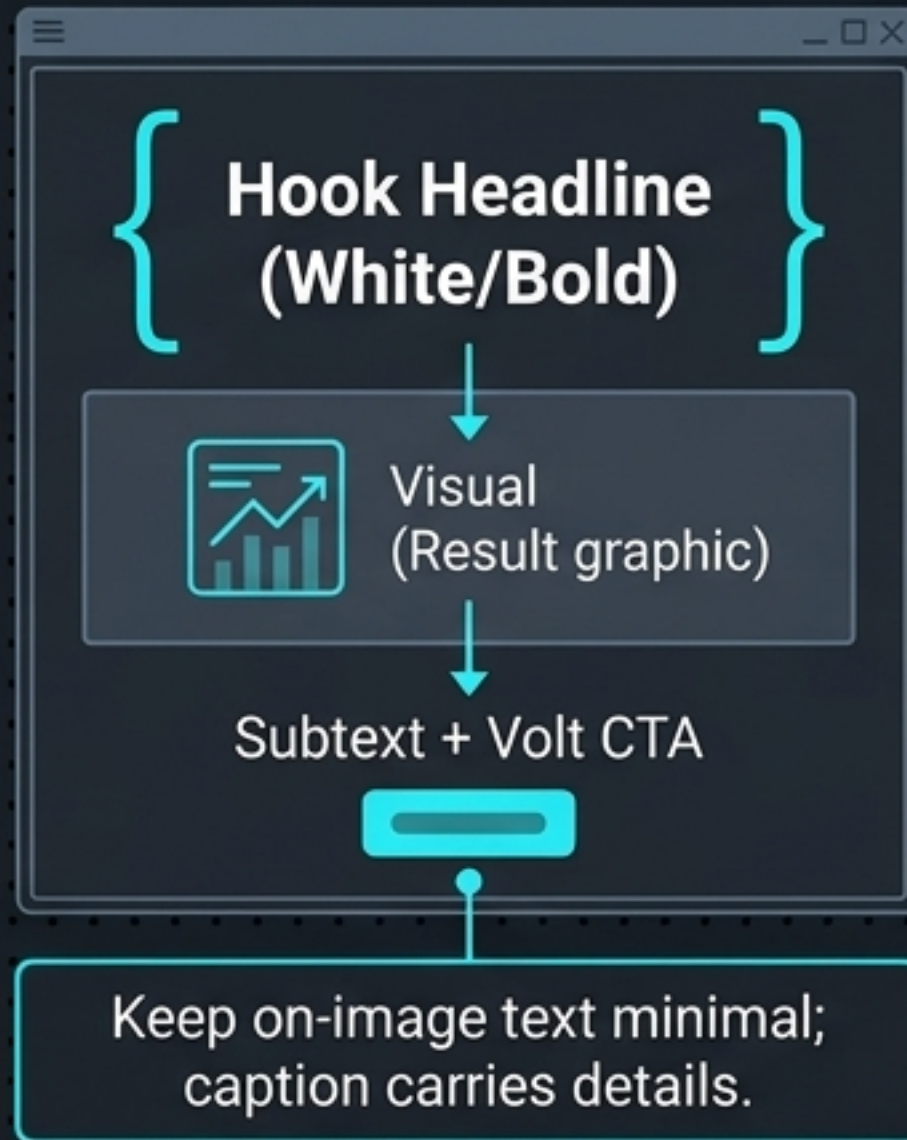

Reels/Video Rules (9:16)

- Hook in first 1-2s (large text + Volt highlight).
- Watermark monogram bottom-right.

Story/Reels Structure

Meta Feed Structure

LinkedIn/Google Structure

Testing Protocol: Build 3-5 variations (2 Feed, 1 Story, 1 LinkedIn) & A/B test headlines.

The System Works

- ✓ Consistent template system for cohesive feeds.
- ✓ One key idea per creative.
- ✓ Text short and legible on mobile feeds.
- ✓ Volt used strategically for CTAs, metrics, and key words.

✗ Randomness

- ✗ Changing styles every week (kills recognition).
- ✗ Overloading posts with too many ideas or visuals.
- ✗ Random gradients/colors outside the strict palette.
- ✗ Moving the logo to different positions.

Ready to Ship Checklist

Assets: Export SVGs + build 4-6 core Figma templates.

Profiles: Sync banners, bios, and handles (@rhymvex).

Content: Queue 2 weeks across the 4 pillars.

Ads: Deploy 3-5 structural variations for testing.
